

St. Joseph's Medical Center

Occupational Health & Rehab Services

A member of CHW

Dear Valued Employer,

We have received wonderful news from our Medical Center that St. Joseph's Occupational Health has saved St. Joseph's over \$500,000.00 in work comp costs over the last 5 years. During this recession businesses all over are looking for ways to trim the budget and survive. **I am happy to share how our program can help your company save money simply by allowing us to manage your Work Comp.**

The management of an Occupational Health Program working closely with HR managers and adjusters has the potential to cut your work comp costs drastically. We are firm believers in Limited Duty options as well as First Aid whenever applicable. **Why would anyone want to pay more during an economic crisis when they can pay less?**

I truly believe that all companies need to meet with their current providers, tour the clinics and then meet and tour other Occupational Health Clinics. It is important to meet with the staff and the Medical Director. If you don't take this time out how will you know that you are investing in the most valuable program to your company? The quality of care and the management of the work comp program are extremely important to you and your employees. I would love to set up an appointment with you in 2009. We have 3 locations to serve you with unlimited services. Once you are in our system you may go to any one of our 3 locations.

I know you are very busy but this 1 hour appointment is of great value to your company's future. Starting this service is a very simple process. Just a matter of 10 minutes to fill out a brief form and we will build a personalized profile for your company. No contracts to sign. **Call 209-954-3280** today for more information and a tour appointment. Your business and your employees will be healthier in 2009. Be sure to ask about our Wellness Program and other services. We help business stay **HEALTHY**.

Sincerely,

Patty Milano
